User Guide Inside

Recoil Enabled Laser Training

SureStrike™

Recoil Enabled Laser Training

SAFETY

IMPROVES ACCURACY

- Simulated Recoil Training • Rapid Fire • Marksmanship
- Speed • Trigger Pull • Magazine Changes • Target Acquisition & More

Instructions

Depending on the product you choose, the recoil enabled solutions can be activated by vibration (REAL, Spider or FLASH) or by pressure (FLASH with the firing pin add on).

Vibration laser cartridges can drain batteries even when not in use.

We recommend taking the battery out of the laser when not being used to preserve battery life.

All Laser types are assembled according to the following:

Laser

Battery

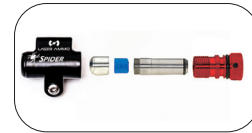

Back Cap

- 1 Unscrew the cartridge.
- 2 Insert the battery pack according to the drawing, plus side facing the back cap.
- 3 Verify the threading is fully closed and there are no gaps.

SPIDER

The Spider is to be used with Airsoft pistols with Picatinny rail and the REAL cartridge.

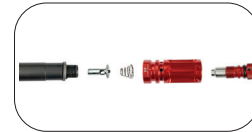

REAL

The REAL is to be used with specific model airsoft pistols and the REAL cartridge.

FLASH

Replacing the flash hider of an airsoft rifles (with CCW 1/14 treads).

To be used with one of the following lasers:

- Flash vibration cartridge (installation is similar to Spider / REAL pic above)
- SureStrike cartridge with the firing pin and spring (see pic)

Using the SureStrike™ Laser Cartridge not according to the user guide will void the warranty.

No liability is expressed or implied for damage or injury as a result of installation or use of this product. Warranty is limited to the replacement or repair of the original product only.
